This study aims to analyze how the influence of capital structure and profitability on the value of companies in sub-Sector Health Companies on the Indonesia Stock Exchange. The sample consists of 8 companies listed on the Indonesia Stock Exchange for the period 2010-2020. The data used in this study is capital structure data represented by Debt to Asset Ratio and Debt to Equity Ratio, profitability data represented by Return On Asset Ratio, all of which are independent variables. While the value of the company is represented by Price to Book Value as a dependent variable. This study uses secondary data in the form of financial statements of sample companies and sample determination using purposive sampling techniques. Data analysis uses classical assumption tests and multiple linear regressions. Based on the results of the statistical test, the Debt to Asset Ratio variable has a negative and significant relationship with price to book value. And Debt to Equity Ratio and Return On Asset have a positive and significant relationship with Price to Book Value. Simultaneously variable Debt to Asset Ratio, Debt to Equity Ratio and Return On Asset have a positive and significant effect on price to book value. The relationship shows that together the higher the Debt to Asset Ratio, Debt to Equity Ratio and Return On Asset the higher the Price To Book Value reflected by the higher investor confidence in the company.
